

Project Objectives

Date	18 November 2022
Team ID	PNT2022TMID49531
Project Name	Exploratory analysis of Rainfall data in India for Agriculture

- (1) You'll be able to understand the problem to classify if it is a regression or a classification kind of problem.
- (2) You will be able to know how to pre-process/clean the data using different data preprocessing techniques.
- (3) You will be able to analyze or get insights into data through visualization.
- (4) Applying different algorithms according to the dataset and based on visualization.
- (5) You will be able to know how to find the accuracy of the model.
- (6) You will be able to know how to build a web application using the Flask framework.
